The following is an examiner's statement of reasons for allowance:

The prior art does not teach the critical particle size range as claimed by applicants in claim 1. This critical particle size results in unexpected properties over the prior art and a discussion of these unexpected properties is discussed in applicants remarks prior to filing of the RCE. The applicants state that Weber, the closest prior art, resembles closely Walocel MKX 60000 and does not have the improved physical properties of water retention capacity, diemensional stablility, formulation performance properties (tile slippage, tensile bond strengths, plastification, and cracking). Thus the applicants' claimed invention has been determined to be allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inquiries may be made to Paul Marcantoni at 571-272-1373.
